

In the past I was nothing but KCP has inspired me to speak and to be self – confident. I started to study there in the nursery in 2008.

We learnt about our culture about how to dance and have fun and show a good image of our school. There were any activities like cricket and jumping.

KCP taught us how to treat others by obeying and respecting others without considering about age and to live in harmony in our society with good behaviour because that is how the students study in KCP

KCP put me into secondary school when before I had no hope to be there. This was with the support of my sponsor Helen. It is a very big thing to have her in my life because she has put the value in my life and she is the one who has helped me to reach who I am now. It was the best support to my family to have my sponsor Helen.

In secondary school they taught us how to manage my school materials and time and how to be in society but this wasn't difficult to me because it was our character because we have been studied in KCP

Now I have finished my secondary school studies but I have worked as a volunteer in the school holidays teaching the young students with their lessons and with other activities in the holidays but also to teach them to work together and to obey and show respect to each other.

With KCP I have visited many places like the Art Gallery in Butare, the Kings Palace in Nyanza and Akagera National Park. When I was at the Art Gallery in Butare I decided I would like to work in tourism.

At secondary school I chose the tourism option for year 4 – 6 I studied the animals in our National Parks, the daily lives of the animals, guiding tourists and trekking. I also learnt about hotels how to work on reception and about housekeeping. I have a dream to visit the Serengeti National Park.

Now I have finished secondary school. I have chosen to continue my studies at the University of Tourism in Kigali.

My hope for the future will be to support other children who don't have support and the children who don't have parents. I want to give them because that is what KCP teaches us to help each other.

I take this chance to thank Meg and Helen I hope this year will bring good things and more successful things.

But finally this is just the beginning because there are more things happening in KCP and because KCP is the endless family for us.

Thank you to all people who support KCP we are very gratefu
