MUHIRWA MOISE

RE: MEMORIES IN KINAMBA COMMUNITY PROJECT

My name is Muhirwa Moise a child from kinamba community project. I joined KCP in 2007. I was very young like 7 years old but now am 21 years old. KCP becomes family to me . I started nursery in KCP and it was where my dreams started .I have learnt many things from KCP especially knowledge, behaviors, values and attitudes.

At the end of my secondary studies , I got good marks 60/60 in national examinations the school organized a special event when I got gifts and a certificate from the bishop. Not only that but also during my ending in secondary school, the school provides me three certificates one from language club, traditional dancing and one from health perfect in committee. This is all thanks to kcp because it was where I firstly got all those skills. I hope that I will continue my studies in university working hard improving more and more those skills I got from kcp so that I shall be able to share it with my little brothers and sisters in KCP.

All from KCP made me a strong boy. I learned different activities from KCP like playing football, games dancing, cricket, lessons and others. I got opportunities from KCP to continue my studies in primary and secondary through sponsorship. This gave me a hope and made me to set a goal that I shall help others when I get a job. Now I am working hard in order to achieve my goal. KCP becomes my role model and I hope that in my hard working I shall follow their footsteps.

We have holiday clubs in KCP. I go there to help my younger brother and sisters to get knowledge and skills. We do different activities such as playing games, doing art, singing and stories. Mostly games we played are ludo, snakes and ladders, puzzles. We also have what we used to call free games including Ollie Ollie the octopus is a game taught to us by Vincent, we play opposite games, and also chair game accompanied by music. This helps them to relax and feels happy.

In holiday club we have done also Art. In this activity we helped our young brothers and sisters in drawing some pictures and coloring them. We have another party of art which is painting that we have done in holiday club where those children are given special pencils with different paints colors and water. We helped them to follow the procedures and most of them have painted good pictures. After we put them on the wall.

Not only games and Art but also dancing and singing. We teach our young brothers and sisters about traditional dancing with drums. Some of them are talented in traditional dancing. Another time we teach them some songs especially KCP songs. This help children to relax and feels happy.

We also teach the children how to play football, rugby, we also play some sports games like flying ball with flag, jumping and shooting bottles on the playground. This was all I learnt from KCP when I was young and now we like teaching it my young brothers and sisters all.

Last is story time. We help the children to write their own stories as the way of improving their English. We also put them on the mats and read for them a book and after ask them some questions on the story we have read for them. Then after KCP provide lunch for children before they go home. Actually seeing my young brothers and sisters happy reminds me how good KCP is and what KCP has done for me. KCP have give a direction to reach my goal. Until now, where am and I have been, all is because of KCP. Kcp have helped me a lot in my studies. When I think how much effort kcp put in me to continues my studies this gives me strong abilities to work hard and succeed. When I finish my studies I will do more for KCP myself. I will share my knowledge and skill I have learnt from kcp to my younger brothers and sisters from kcp. I hope that I will work hard and help others, that's my dreams I have seen how good it is to help.

When I think all of this, I can't forget how kcp have done to my family. I have three brothers and mother only. My mother was jobless and she were not being able to pay for us to study. At that time KCP comes like our last hope they helped me and my big brother. They give job to my mother and build our house. They brought more happiness to my family. I hope that also one day I shall bring happiness to another family like how KCP has done for me.

MOSES AT COLLEGE OF SCIENCE AND TECHNOLOGY

After secondary I began my studies at the University of Science and Technology in Civil Engineering. Am really thankful to KCP for supporting me. Now am enjoying the university and becoming familiar with it, studying five days per week full time. Most of the days my class starts at 9;00 am and ends 5;00 pm. I am studying well managing my time usually doing assignments and CATS tests well. I hope i will study well, to work hard is my ambition and goal and I hope that I will succeed. This is all thanks to KCP. Actually thank you very much for giving me hope, a direction and the will and motivation. I cant forget this kind of love and I hope that in future I can show the true love you showed to me towards others. KCP is my family, Sometimes my class is postponed when lecture is not present.

I still join KCP holiday club to help my young sisters and brothers in doing different activities such as arts playing games and dancing.

This year I have also been helping the primary children in the evenings with their studies.

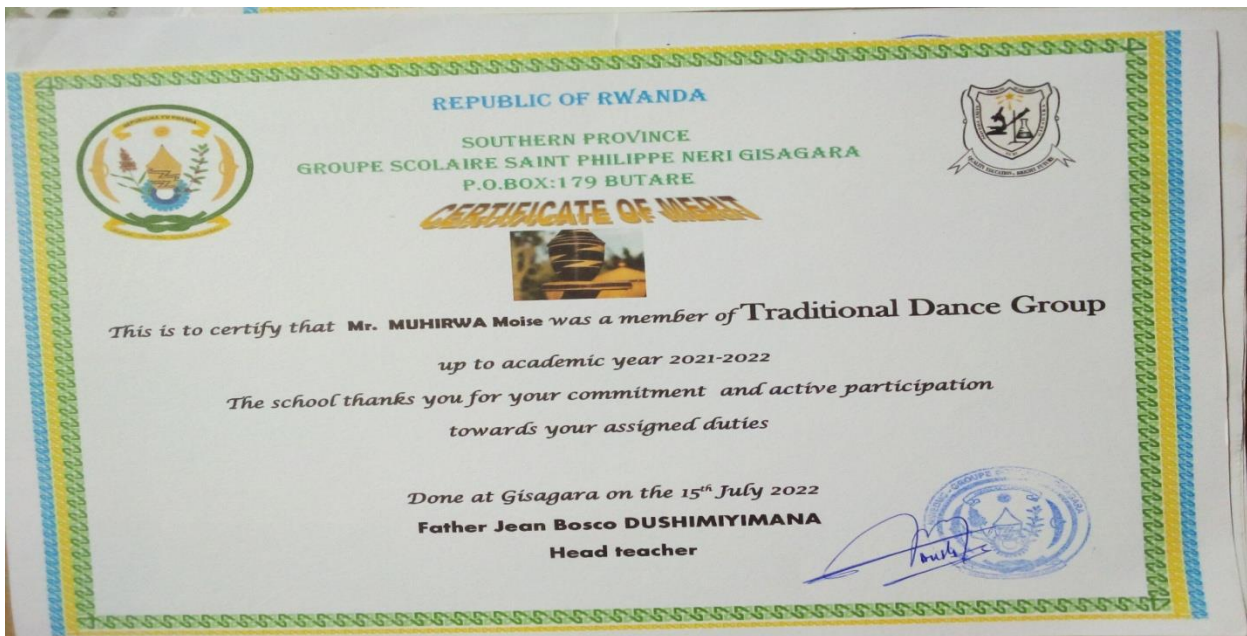

GS ST PHILIPPE NERI GISAGARA
